

# Autobase

## The most intuitive CRM in the industry is accessible anywhere with Autobase.

### Host Your CRM Data in the Cloud

The new Autobase *Online* enables you to review deals anywhere and on any device, even while you are traveling. Now that Autobase is available through the internet, on-site servers are no longer necessary. All you need to access your account is a web browser and adequate bandwidth. This eliminates any concern around server and backup maintenance.

### Fast and Easy Functionality

In addition to now being accessible everywhere you go, Autobase also maintains the speed you already enjoy with your current on-premise server. The ability to upload documents and pictures directly from your desktop eliminates the need for file sharing on a local network. Emailing information to customers just got a whole lot easier.

## Benefits

- Accessible from anywhere with an internet connection
- Securely manages and automatically backs up CRM data
- Reduction in cost for IT resources
- Compatible across devices, including most tablets
- Virtually no training needed to get started

## Features

- Accessible with most browsers, including: Chrome, Firefox, Internet Explorer, and Safari
- Run Autobase in multiple browser tabs simultaneously
- Upload attachments and images directly from your device
- Print anywhere
- Utilize keyboard shortcuts for efficiency
