

## Identify bottlenecks and streamline reconditioning process to get your used vehicles ready for sale faster with Dominion Recon, now available in Dominion Inventory Manager.

Getting your vehicles ready for sale as quickly as possible is critical to your ROI success. With Dominion Recon, now available in Dominion Inventory Manager, you can track and manage the entire reconditioning process.

From the moment vehicles arrive on your lot, you'll know where they are moving efficiently - and where bottlenecks are costing you money. At the completion of each step, the next department scheduled for work is alerted, so you can keep your cars moving through the process. Dominion Recon helps you reduce time to market and track accountability with total visibility and control.

**Recon Dealer Times Pre Recon vs Post Recon**

Vehicles at dealerships using Dominion Recon moved through the process about 10 days faster than at other dealerships.

### Features

- Results-driven software
- Instant alerts: next department is alerted as vehicles move to next
- Mobile access: scan and swipe to move vehicles to the next step
- Executive, manager and operational alerts, reports and dashboards
- Configured to your individual dealership process
- Dealer-defined workflows

### Benefits

- Identify bottlenecks
- Track flow and accountability through customized used car process
- Alert and deploy resources at the right time
- Hold departments accountable for time to market

### Days Spent in Recon

Dealers **without** recon software

Dealers **with** recon software

Dealers saved an average of 7.1 days after they added Dominion Recon.

\* Dominion Dealer Solutions studied 100 Dealers who are utilizing Dominion Inventory Manager and who have ad Dominion Recon for at least 90 days.
